The role of teams and leadership

How can leaders enable resilience in hospital teams?

A close-up photograph of a yellow, reflective sign. The sign has a textured, honeycomb-like surface and is mounted on a yellow metal post. The text "SCIENCE AHEAD" is printed in large, bold, black, sans-serif capital letters. The sign is slightly tilted to the right. The background is dark and out of focus.

Building competence

Balancing workload, risk, and staff needs

A photograph of two healthcare workers in a clinical setting, wearing full personal protective equipment (PPE) including white gowns, blue hairnets, and blue surgical masks. They are embracing each other, suggesting a moment of support or relief. The background shows a brightly lit hospital corridor with a window and a door.

Relational leadership and staying close to everyday work

A woman with long brown hair tied in a ponytail is seen from behind, sitting at a desk in an office. She is looking at a computer monitor. The office environment is blurred in the background, showing other desks and equipment.

Situational understanding of work practice

Contextual understanding

Relational understanding

A photograph of three young women in soccer uniforms celebrating on a field at sunset. One woman is being carried piggyback by another, and a third woman is in the foreground, all smiling and laughing. The background shows a grassy field with other players and a building in the distance under a warm, golden light.
